NAIROBI, KENYA

SUMMARY

Software Engineer specializing in systems programming and fintech infrastructure. Computer Science student at Strathmore University and Software Engineering Intern at Qhala, with hands-on experience building production payment systems and high-performance databases. Created Singularity Payments, a TypeScript SDK for M-Pesa integration used by multiple developers, demonstrating expertise in API design and developer tooling. Developed multiple database systems in Go including Cachet (in-memory database) and NimbleDB, showcasing low-level systems programming capabilities. Built full-stack applications including Trot (React Native car rental app) and Codepass (multi-language coding platform on Azure). Strong foundation in Go, TypeScript, Java, and cloud infrastructure, with a focus on building developer tools and payment infrastructure for African markets.

EDUCATION

Strathmore University: BSC Informatics and Computer Science

2024-2028

Courses: Data Structures and Algorithms, Web Application Development, Object Oriented Programming, Probability and Statistics, Internet Application Coding

- Participated in hackathons where I developed an Android Security app
- Participated in projects by the National Research Fund
- Dean's List 2025

Light Academy: KCSE - A

2020-2023

- Top 0.14% of students in the country out of 900000
- Ranked Best in the National Science Olympiad (Physics)
- Finalist InterswitchSPAK-Physics
- Finalist iStem Computer Science and Physics
- Core member of the Debate and Programming Club
- Played Rugby and Volleyball

EXPERIENCE

Software Engineering Intern | Qhala

2024-Present

- Developed frontend for 2-billion-dollar CANEX initiative led by Afriexim Bank and African Union supporting African creatives.
- Conducted database management and optimization tasks for the CEMA website.
- Built the backend of the CEMA website
- Designed APIs to support projects leveraging GraphQL, Express, and RPC technologies.
- Participated in Agile development processes, contributing to sprint planning and reviews.

- Engaged in code reviews to guarantee adherence to coding best practices.
- Collaborated with senior engineers to design, code, and deploy scalable applications.
- Employed version control tools like Git to manage code changes and collaboration effectively.
- Assisted implementation teams throughout development, testing and system acceptance phases.

Lead Developer | Investment Youth Ventures

2024-2025

- Spearheaded the creation of cross platform mobile app called Trot App.
- Trained junior developers in effective coding techniques.

ACTIVITIES

- **Singularity Payments JS | TypeScript** -<https://github.com/singularityke/singularity-payments-js>
 - Comprehensive M-Pesa SDK for easy mobile payment integration in TypeScript/JavaScript applications
 - 6 stars, 2 forks - actively used by developers for Kenya mobile payments
- **Codepass | Go, Svelte, Docker, Azure Kubernetes Service** - <https://codepass.app/>
 - Multi-language coding platform supporting 40+ programming languages
 - Deployed on Azure with containerized architecture
- **Cachet | Go** <https://github.com/kelvinwambua/cachet>
 - High-performance in-memory database alternative to Redis
 - Telnet-based protocol for client access
- **NimbleDB | Go** -<https://github.com/kelvinwambua/nimbledb>
 - Custom database implementation in Go
- **Trot App | TypeScript, React Native** - <https://github.com/kelvinwambua/trotapp>
 - Mobile application for car rentals on Android & iOS
- **AI Detector & Humanizer | Python, FastAPI, Node.js, Docker** -<https://humanizer.vercel.app/>
 - Hugging Face model deployment for AI text detection
 - Generates humanized text rephrasing
- **Socials | TypeScript** - <https://github.com/kelvinwambua/socials>
 - Social networking platform for university students to connect and make friends
- **SuFeeds | Java**-<https://github.com/kelvinwambua/SuFeeds>

SKILLS

- **Languages:** Go, TypeScript, JavaScript, Java, Python, C, C#
- **Frontend Development:** React, Next.js, Svelte, TailwindCSS, React Native
- **Backend Development:** Fiber (Go), Express.js, Spring Boot, FastAPI, Node.js, REST APIs
- **Databases & Caching:** PostgreSQL, MySQL, MongoDB, Redis, Custom DB Implementation (Cachet, NimbleDB)
- **Cloud & DevOps:** Azure, Azure Kubernetes Service (AKS), Docker, Kubernetes, Container Orchestration
- **AI/ML & Tools:** Hugging Face Transformers, AI Model Deployment, Git/GitHub
- **Payment Integration:** M-Pesa API, Mobile Payment Systems, Fintech SDK Development
- **Systems Programming:** In-Memory Databases, Telnet Protocols, Low-Level System Design
